
protein entropy
3Di entropy
12-state entropy
a Bacteria
b Archaea
change in mean entropy since 100 aa (bits)
100→300 aa
observed +0.08
bias +0.11 bits
100→300 aa
observed +0.88
bias +0.11 bits
100→300 aa
observed +0.85
bias +0.06 bits
100→300 aa
observed +0.09
bias +0.11 bits
100→300 aa
observed +0.76
bias +0.10 bits
100→300 aa
observed +0.75
bias +0.06 bits
ORF length (aa)
rise not explained by bias
observed (ORFs matching a GenBank CDS)
expected rise from estimator bias alone (random sequences)
